

Core Drill Set

Staring core drill set available in two variants: one for soft materials and one for reinforced concrete. Both sets include the five most common sizes for plumbing and general construction work.

The core bits produce fewer vibrations, providing greater working comfort.

The core bits are standard dry drills but can also be used wet, which will extend the lifespan of both the drill and the segments.

STD-014-320

The core bits are 150 mm deep with an M14 thread. For optimal performance and results, it is recommended to use a tool with at least 850W of power. The machine should also be capable of at least 3000 rpm and have variable speed control.

Drill set:

Supplied in an aluminum trolley containing:

- 5 dry core bits in sizes: Ø 32-52-82-112-132 mm
- Center drill bit
- 200 mm extension
- Adapters for SDS connection

Suitable for use on:

- Brick
- Limestone
- Roof tiles
- Sandstone
- Granite
- Hard stones
- Reinforced concrete*

*Applies only to the Work Hard version.
