

# Easy Hammer

## Effective concrete remover.

Easy Hammer concrete remover is a chemical product designed for the removal of concrete from most surfaces. It does not damage rubber, glass, aluminum, finished painted, or unpainted surfaces.

Easy Hammer concrete remover is an effective and environmentally friendly chemical for the removal of concrete and cement from machinery, tools, and concrete trucks.

### USE.

**Pre-treatment:** The substrate should be dry to ensure the best penetration. ALWAYS test Easy Hammer on a very small area first. Wait and observe the effect before using it on larger or multiple surfaces. Always wash the object afterward with plenty of water and let it dry again to see the final result.

### APPLICATION.

**Working temperature:** min. 5°C - max. 40°C

At lower temperatures, the effect is slower.

Avoid working in direct sunlight as it shortens the lifespan and reduces effectiveness. Let the concrete remover work until a white layer is left, then rinse with a high-pressure cleaner. Repeat the treatment if necessary.

**NOTE:** Concrete remover should not be used on marble and other calcareous products.
