Pan Mixer

STB-200 [STB-020030400CHK]

Supplied as standard:

- Safety lid with bag cutter
- Magnetic safety switch
- Puncture-proof transport wheels
- Raised loading wheels
- Tow-bar

Typical applications:

- Concrete with aggregate up to Ø 35 mm
- Mortar
- LECA-based mixes
- Epoxy systems
- Feed blends
- Dry-mix / insulation materials

VibFlow®

Can be delivered with VibFlow® a patented vibration system for improved discharge.

The STB-200 is a rugged, all-round forced-action mixer that handles batch sizes of roughly 200 litres. Its heavy-duty design makes it a go-to choice across construction, civil engineering, agriculture, flooring and epoxy trades.

A specially contoured mixing head keeps the drum self-cleaning while delivering a fast, uniform blend. The head accepts steel or rubber paddles and lifts clear of the drum without tools, so cleaning and paddle adjustment take only moments.

For single-operator handling, the mixer rides on large transport wheels, while high-mounted loading wheels let one person roll it into a van or onto a site.

A wide, hinged safety lid is shaped so coarse aggregate can be tipped in without obstruction and is equipped with an integrated bag cutter and magnetic safety interlock.

MODEL	STB-200
Prod no.	STB-020030400CHK
Mixing capacity	200 L
Drum diameter	850 mm
Drum height (internal)	320 mm
Mixing arms	3
Discharge height	630 mm
Overall width	1100 mm
Overall length	1355 mm
Overall height	1355 mm
Total weight	225 Kg
Motor type	Electric
Motor power	3,0kW (S1)
Voltage	400V~/ 50 Hz
