Staring Suction Cups for Demanding Tasks and Heavy Lifting

Whether you're working with large-format tiles, slabs, or similar materials, having a secure grip is essential. With Staring's suction cups, you can confidently handle both smooth and rough surfaces.

Our suction cups come in three variants: a basic model, one with a manometer, and an electric, rechargeable version with a built-in battery offering up to 5 hours of operation.

All variants share the same key features: easy operation and a reliable grip, even for heavy lifting tasks!

As an additional noteworthy feature of the STL-205-36, it should be highlighted that it:

- **Automatically re-establishes vacuum if it drops during operation!**
- **Automatically creates a new vacuum when it comes into contact with a new tile/surface!**
