

# Filterbox

## STAC-300 [STAC-300]

Filterbox STAC-300 from Staring is your new best friend on the construction site. It is extremely lightweight and made of practical, impact-resistant white plastic.

You can connect the filter box to your blower with a 305 mm connection hose, creating the perfect system for quick and efficient air purification.

The STAC-300 comes with a connection hose, a HEPA 13 filter, and a pre-filter, making it ready to use upon delivery.

### Filterbox features:

- Compatible with VAF-305 flexhose
- Can hold up to 3 filters
- Mounted on the suction side but can also be connected on the blowing side!
